## E-Newsletter—June 2008

### Back with a vengeance... and talking more than ever!

Later this year Cranford Controls will be launching their brand new VCL! The VCL will maintain its aesthetically pleasing appearance but the circuit will be revamped to exploit new components' advances in technology. It is being designed to have a vast memory capacity and vast processing power, allowing tones and messages to be selected on site. The new VCL will be more efficient and we are anticipating it to be a great success!

### Be Square with Cranford!

This handy compact door retainer has a holding force of 200N within its sturdy aluminium casing. The structure has a 3D cube shape is available to either a 24V supply or voltage. The conveniently placed switch on the front of the retainer aids with ease of use and helps maintain the professional and discrete look of the product.

robust an almost to it and run off power mains

### Call Us Approved... EN54 Approved!

Cranford's brand new CPT has been approved to EN54 part 11. Available for either flush or surface mounting, featuring an interchangeable glass element which comes complete with a protective film covering, this ideal CPT is now available!

### Announcements!

**\*\*Katy Green, Operations Director, has now returned to work from her maternity leave. Both Katy and Cranford Controls are delighted at her return. Katy's first port of call is the restructuring of the company to ensure all of our customers receive the most out of us\*\***

**\*\*Cranford Controls will be exhibiting at Firex North on 21st-22nd October 2008 at Harrogate. We can be found at stand A42, we hope to see you there!\*\***

**\*\*We are pleased to announce Claire Knott, UK Technical Sales Manager, has given birth to a healthy baby boy, Joshua Jack. We would like to wish the Knott family all the best.\*\***

### VSO LED...NOW LANDED!!

Cranford Controls' innovative VSO LED is now available! This unique sounder is available in a 4 or 32 tone choice and is not only

obtainable with a clear lens but now also in an amber, red or blue colour option. Providing a full 360° light dispersion and maximum sound output - this product is quickly proving to be a very popular and welcome addition to both the fire and security sectors.

### Ding Dong!

Cranford's old style 6" 24V motorised bell combines maximum performance, with rapid installation in a sleek, low profile appearance. Its tamper resistant hex bolt makes this product ideal for use within areas with a risk of vandalism and also for schools, where it can be used to indicate class change or alert to a fire.

Cranford's would like to offer their customers a very *Special Offer...*

£4.50 per bell for quantities of 100 +

Or £4.95 per bell when ordering up to 50.

But hurry, this brilliant offer will end soon!
